## Something unmistakable

**Ape** is a very special vehicle. If you close your eyes, you can imagine one. Its unmistakable shape has crossed our country at large in time and space. Talking about **Ape** is telling an Italian story, born of the ingeniousness of the aeronautic designer Corradino d'Ascanio and the far-sightedness of Enrico Piaggio more than half a century ago. An evergreen legend which ran through the Italian history, marking the crucial moments from the post-second-world-war period up to now. From the first **Ape** (1948), manufactured during the reconstruction period, through the **Ape C** featuring the Italian economic boom, up

to the futuristic **Ape Pentarò**, with 5 wheels, beginning Sixties, and the **Ape Car**, queen of the Seventies. And again from the **Ape TM** designed in 1982 by Giorgetto Giugiaro up to recent models such as **Ape Cross**, meant for young people. A long way, through everyday life of generations, which earned **Ape** an extraordinary popularity and charm. One of a kind and unmistakable, **Ape**, in spite of its numerous models and the various product updating, has always kept its identity and it is always ready to offer its precious aid without taking, we could say in jest, a single day of rest.

### **APE WEB**

The Ape of the 3rd millennium. Future is now with Ape Web. A modern design with brand-new rear lights, rolled-steel section rear cargo deck, metallic mat and many other beautiful details to be discovered. Today, for you and your friends, there's a new connection community: Ape Web.

### **APE 50 PICK-UP**

The original. Always ready to help you out. Unbeatable for its small dimensions, manoeuvrability and limited consumptions. The ideal solution in rural and urban areas.

### **APE TM PANEL VAN**

For bulk deliveries. With Ape TM panel van you can have all the room you need. Thanks to a large compartment everything is easy to load and carry.

### **APE CROSS COUNTRY**

Your young pick-up. You'll never go unnoticed on it thanks to the trendy colours of its body, the massive and secure roll-bars and the rich standard equipment.

### **APE 50 PANEL VAN**

The small van. Useful for small and frequent deliveries through the city. Besides offering more space, it ensures easy loading and the utmost reliability.

### **APE TM PICK-UP**

The true Ape par excellence. Ape TM offers you a wide loading capacity with low consumption petrol and diesel engines, as well as the possibility of transport on medium- and long-distance trips.

# Ape 50

## Ape 50

### **Small and generous**

Ape 50 is the range of the smallest and most generous vehicles in the world. Small? Yes!! The reason is that no other vehicle can find a parking so easily or pass through the narrowest roads. Generous? Yes, extremely. Incredible is the quantity of goods it can carry (up to 200 Kg and 1,5 cubic meters) with so limited consumptions, all within 2,5 metres length only. Long or short rear cargo deck, spacious like the panel van model or young like Cross model, we bet it won't take you so long to find out which one of these models suits you better.

# Web

## Ape Web

The new generation Ape is already here and never stops stunning. Brand-new rear lights featuring an innovative design, rolled-steel section rear cargo deck, metallic mat, third stop light, colourful and resistant roll-bars and everything else you can desire to have on your Ape. It's time to start connecting with your friends, it's time to enter the net, it's time to discover Ape Web.

### BODY

## Ape Cross Country

The simply trendy pick-up, thanks to the colours of its body and the "young" standard equipments. Safe, with roll-bar, front and rear fender, third stop light and wide rear-view mirrors. Comfortable, because you can carry your surf or snowboard inside whilst you listen to your favourite music with the standard car radio set. With Ape 50 Cross you'll never go unnoticed.

### BODY

The colour range is constantly updated. Ask your dealer for new colours.

# Ape TM

## Ape TM

### **Ape, by definition.**

When you think about Ape, you cannot think of anything else than Ape TM. Ape TM meets thoroughly your transport requirements.

Thanks to its versatility and limited overall dimensions, Ape TM is the ideal answer. It can carry more than 700 Kg payload (pick-up model) without losing even a gram of reliability. Reliability and life duration are ensured by low consumption diesel and petrol engines and the zinc-coated wearable components.

## Ape TM pick-up

The working Ape par excellence. It is available both with short and long rear cargo deck. In long rear cargo deck model, the payload area is 2,75 square metres with transportable weight of over 700 Kg. You can choose between handlebar model, for suburban areas and the steering wheel model, for driving inside and outside the city. It's also available with long-lasting light alloy sides featuring a modern design.

### BODY

## Ape TM panel van

Suitable for big deliveries. It is the most suitable vehicle for the transportation of big loads within the city and indispensable to shield the load from bad weather. 2,5 cubic metres of available space for almost 700 kg of transportable weight are the winning numbers of its payload capacity.
